SUMMARY

AI Engineer and Python Full Stack Developer with experience in building scalable backend systems, API integrations, ERP solutions, and Generative AI applications. Skilled in FastAPI, RAG pipelines, LLM fine-tuning, multi-agent AI systems, and intelligent automation workflows. Experienced in developing enterprise applications, inventory optimization systems, and AI-powered solutions using modern open-source and frontier models.

SKILLS

- | | |
|-------------------|--------------------------------|
| • Python | • AI/ML |
| • Generative AI | • RAG |
| • NLP | • Agentic AI Systems |
| • LLM Fine-Tuning | • Docker |
| • AWS Cloud | • Jenkins |
| • FastAPI | • JavaScript |
| • Next.js | • SQL |
| • Java | • Git |
| • GitHub | • Data Structures & Algorithms |
| • System Design | • ERP Applications (Odoo) |

EXPERIENCE

- | | |
|---|-------------------|
| Software Developer, Earbor | 07/2025 – Present |
| <ul style="list-style-type: none">Designed and delivered Python backend modules and FastAPI integrations for enterprise business applications.Developed scalable API integrations for external systems, enhancing warehouse operations, receipt flows, and order synchronization.Led ERP solution implementation for restaurant, retail, and e-commerce clients, improving operational workflows.Worked on inventory optimization, reporting automation, and business process customization for production environments.Contributed to AI-oriented automation initiatives by implementing LLM concepts and integrating intelligent workflows.Developed automated invoice-to-Excel processing workflows, reducing manual documentation effort.. | |
| Software Trainee, Edvenswa Tech | 09/2024 – 06/2025 |
| <ul style="list-style-type: none">Designed and built enterprise-grade applications to improve user experience and streamline functionality.Developed Enterprise Employee Nervous System using Python, SQL, React, and Next.js.Developed enterprise application testing agent to automate test case execution, reducing reliance on manual testing.Collaborated on business integrations and customized products to meet specific enterprise requirements. | |

CERTIFICATIONS

- UDEMY - LLM Engineer Build and Deploy 8 LLM Apps, mastering Generative AI, RAG, LoRA and AI Agents.
 - GOOGLE CLOUD - Natural Language Processing Badge
 - SQL & PL/SQL Certification - Naresh IT
- UDEMY - AI Engineer Agentic Track: The Complete Agent & MCP Course
 - n8n - n8n Course Level 1 & 2
 - Advanced Java Certification - Naresh IT

PERSONAL AI & GENERATIVE AI PROJECTS

Multi-Agent AI Systems

- Developed autonomous multi-agent AI systems with serverless deployment architecture.
- Built scalable AI workflows for automation and orchestration, and intelligent task execution.
- Integrated frontier models including GPT, Gemini, and Claude for AI-driven operations.

LLM Fine-Tuning & Price Prediction

- Fine-tuned open-source LLMs such as Ollama, GPT-OSS-20B, and Gemma using QLoRA, LoRA, SFT, and quantization techniques.
- Built ecommerce price prediction models using product descriptions and NLP-based feature extraction
- Implemente Worked with both open-source and frontier models for intelligent prediction systems

RAG & Multimodal AI Applications

- Developed complete RAG pipelines using LangChain and ChromaDB for semantic search and contextual AI responses.
- Built multimodal chatbots for insurance-based AI applications with retrieval-augmented generation
- Implemented AI-powered website-to-text conversion using GPT and Gemini APIs.

AI Automation & NLP Solutions

- Built AI-powered code generation and code conversion systems using GPT, Claude, and Gemini
- Developed open-source GenAI solutions using Hugging Face, Ollama, GPT-OSS-20B, and Gemma.
- Created multilingual song lyrics translation tools using NLP techniques and YouTube Music data.

EDUCATION

B.Tech , <i>Sree Vidyanikethan Engineering College, Tirupati, Andhra Pradesh</i> • GPA: 8.0/10	03/2024
Diploma , <i>E.S.C Govt Polytechnic College, Nandyal</i> • GPA: 8	01/2021
